

WRITING SKILLS SOLUTIONS - QUESTION 8

Q8 (A). Your school recently organised an inter-house activity week in which students worked in teams for quizzes, sports, creative tasks and problem-solving activities. The events showed how cooperation, communication and shared responsibility can help a group achieve its goals.

Based on the given information, write an article for your school magazine on the topic "Together We Achieve More". Highlight the importance of teamwork and how students can develop the spirit of cooperation in everyday school life. You are XYZ of Class IX. (120-150 words)

TOGETHER WE ACHIEVE MORE

By XYZ, Class IX

Working together helps us complete difficult tasks easily. Our school recently conducted an inter-house activity week. Students participated in quizzes, sports, and creative events. Every team showed excellent cooperation, communication, and shared responsibility to achieve success.

Teamwork is an essential skill for every student. When we work in a group, we share diverse ideas and solve problems faster. Group work also teaches us patience, mutual respect, and helpfulness. A single person cannot know everything, but a united team can overcome any challenge.

Students can build teamwork in daily school life. We can collaborate on classroom projects, help classmates in studies, and play games together peacefully. Listening to everyone and supporting teammates creates a positive environment. Remember, individual effort brings good results, but teamwork achieves greatness.

Q8 (B). Many teenagers spend a considerable amount of time on mobile phones, gaming and social media. Digital devices are useful for learning and communication, but excessive use may affect sleep, concentration and face-to-face interaction.

Write an article for your school magazine on the topic "Screen Time: Finding the Right Balance". Highlight the need for responsible use of digital devices and suggest practical ways to maintain a healthy balance. You are XYZ of Class IX. (120-150 words)

SCREEN TIME: FINDING THE RIGHT BALANCE

By XYZ, Class IX

Digital devices have become a big part of our daily lives. Mobile phones and laptops help students study, communicate, and learn new things. However, spending too much time on screen games and social media can cause health and personal issues.

Excessive screen time damages eye health and disrupts night sleep. It also reduces concentration in studies and lowers physical activity. Many students spend less time talking to family members and real friends because of phone addiction.

Therefore, we must use technology responsibly. Students should set daily time limits for phone usage. We must turn off screens at least one hour before sleeping. Spending more time outdoors, playing sports, reading books, and talking with family will help maintain a healthy life balance.
